Projects

Ticketline 4.0

▹ Developed a comprehensive web application for selling tickets and merchandise, featuring robust authentication and role-based access.

▹ Leveraged cutting-edge technologies and frameworks, including JPA, Angular, TypeScript, Spring Boot, and an H2O-Database.

Find-More – @Mohrenbrauerei

▹ Developed a full-stack web application to centralize article storage and enable efficient retrieval by users.

▹ Utilized technologies and frameworks such as GraphQL, CRA, JavaScript, Node.js, and MongoDB Atlas.

Relevance Work Experience

Backend-Developer – @IMA Schelling   July 2023 – August 2023

▹ Developed and maintained the backend infrastructure of a software application with C#

▹ Learned and applied industry-standard development practices for backend software development.

Frontend-Developer – @TOWA Digital   August 2023– October 2023

▹ Gained hands-on experience in modern frontend development practices, including component-based architecture, state management, and UI testing using tools like Jest or Vue Testing Library.
